ABOUT US

A light gray world map is shown in the background. Several countries are highlighted in a dark blue color: France, Italy, Spain, Monaco, Saudi Arabia, and Kuwait. The rest of the world map is in a light gray tone.

Acrobatica is the leading company in Italy and Europe in the field of operational construction in **double safety rope**.

We operate with around 175 branches in **Italy, France, Spain, Monaco, United Arab Emirates, Saudi Arabia, Kuwait**.

It all began in the early 90s, when Riccardo Iovino, a skipper of Genoa accustomed to moving at high altitudes to carry out maintenance on the masts of boats, found himself in front of a friend who had to solve the problem of a gutter to be repaired in a poorly accessible spot.

Riccardo proposes to do the job himself, climbing up the roof with the ropework technique. In a few hours the problem is solved and the Founder of Edilziacrobatica gains a bottle of wine and, above all, an idea: rope works allow to intervene effectively outside the buildings with enormous advantages in terms of time and money that traditional construction cannot offer.

“Seeing the enthusiasm and gratitude that came out of my speech, I saw the opportunity of a useful service for many people:

to make simple what would be complicated in another way, with both economic and efficiency advantages“

In 2007 when Anna Marras joined the Group, the real turning point in the business was sanctioned with the creation of a sales network, the creation of an internal HR department focused on people and the continuous recruitment of talents.

OUR SERVICES

**BUILDINGS WITH MORE
THAN 3 FLOORS**

SECURING AND PROMPT INTERVENTION

Prompt intervention includes all the services that are provided urgently, such as removal of rickety objects of the building.

RENOVATION AND MAINTENANCE

Restructuring and maintenance of facades, balconies and ledges. Ordinary maintenance of hedges as well as the rebuilding.

BUILDING CLEANING

Cleaning of walls and facades (glazing and/or cladding panels), roofs, solar panels and windmills, gutters and downpipes.

PROOFING INTERVENTION

Removal of localized infiltrations or the complete rebuilding of the waterproofing system that may concern balconies, roofs, ledges and hedges.

OUR BUSINESSES

RENOVATE, REBUILD, RETHINK

OUR CUSTOMERS

FAMILIES

The best opportunity for families is that you can plan the work and, consequently, the expenses. You can also schedule a maintenance plan of your condominium; This will be very useful to avoid irreversible damages that would cause higher expenses.

BUILDING MANAGER

Our assistance service for condominium administrators will help you discover the advantages of rope access. We offer prompt technical support, innovative solutions and management of the construction work in all its aspects, from the request of a quote to the completion of the site.

GREAT WORKS, MONUMENTS

Working at height with rope access we perform jobs on monuments and historical buildings without disturbing tourists. For example, our rope access technicians worked on Ponte Vecchio in Florence, on the Roman Forum and the Rocca Salimbeni in Siena.

CORPORATE AND HOTEL

Nowadays, image is more important than ever in the tourist industry. If a structure appears neglected or unidentified, it will adversely affect public opinion and online reputation. With a restyling of your hotel with work done on the facades, your business won't need to close for even a single day.

THE REAL STRENGTH OF ACROBATICA IS
PEOPLE

ESG

ACROBÀTICA

Highlight ESG and Low Risk Rating by Sustainalytics

ESG Risk Rating COMPREHENSIVE

11.8 Low Risk

Last Full Update: Jan 16, 2023

Last Update: Apr 13, 2023

a Morningstar company

ENVIRONMENT

Acrobatica Business is characterized by a reduced environmental impact, especially when compared to that of traditional construction in terms of greenhouse gas emissions, energy consumption and use of water resources.

SOCIAL

Acrobatica has always given great importance to respect for human rights, health and safety, human capital development, training and support for local communities.

GOVERNANCE

Acrobatica has strengthened the sustainability governance structure, establishing a dedicated committee, developing an ESG framework and implementing the «ESG Policy».

- The ESG path of EdiliziAcrobatica is the result of a formal process that began in 2020. From a substantial point of view, sustainability was already integrated into the business model and into the original idea that gave life to the company.
- The main feature of EdiliziAcrobatica's business is its low environmental impact, especially when compared to that of traditional construction. The company nonetheless monitors environmental KPIs, uses energy from renewable sources for headquarters and offices, is replacing the fleet with electric vehicles and is implementing a policy for the end-of-life of the materials used.
- On the Social side, perhaps the most relevant for the characteristics of EdiliziAcrobatica, the management pays great attention to gender policies, training, social responsibility and the communities in which it operates. The issue of safety is particularly sensitive, addressed with continuous certifications and training.
- On the Governance front, since 2020 the issue of strengthening the management structure, the adoption of Law 231 and the implementation of an ESG framework, whose ESG Policy was approved by the BoD on 22 December 2020, have been a priority.
- Since its founding, sustainability has been an integral element of Acrobatica's business model. The achievement of an ESG Risk Rating of 11.8 - Low Risk by Sustainalytics certifies the result.
